DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I, claims 1-9 in Paper No. 6 is acknowledged.

Drawings

2. Figure 1 should apparently be designated by a legend such as --Prior Art-- because only that which is old is seems to be illustrated. See MPEP § 608.02(g). If Figure 1 is not in fact "Prior Art", applicant should clarify such in response to this Office action. If Figure 1 does show "Prior Art", than **a proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.**

Specification

3. The disclosure is objected to because of the following informalities: Page 5, line 22, "Those" is misspelled.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

4. Claims 2, 3, 5, 7, and 8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 1724

In claims 2, 3, 5, and 8, "the discharge chamber" lacks antecedent basis.

In claim 7, "the connecting means" and "the chamber" lack antecedent basis. Also, in claim 7, it is unclear as to what element applicant is referring with respect to "it" on the penultimate line.

Applicant should note that while the reference numerals may exist within the claims, so long as they are within parentheses, they cannot be considered to provide patentable weight to the claim by defining the scope of the claim absent clear and concise language that defines the claimed elements.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1, 2, 4, 6, and 9 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by either Etcheverria et al (Figs. 1-3) or Carr et al (Fig. 1).

Applicant should note that a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. Therefore, the recitation by applicant of the materials worked on cannot be considered to lend patentable weight to the claimed apparatus. See *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963).

Art Unit: 1724

Applicant should also note that the use of terminology within the claims, such as "possibly" and "preferably" allows for an extremely broad interpretation of a claim, wherein some elements may in fact be considered optional and thus not positively recited by the claim.

Allowable Subject Matter

7. Claims 3, 5, 7, and 8 would be allowable if rewritten to overcome the rejections under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
